

Profile connector AL adjustable 0-5°

- The adjustable profile connector is suitable for cost-effectively adjusting the vertical inclination of section profiles to an angle of 0-5°

Product description

The section profiles do not require a miter cut.

For a smooth transition of the chain, only the sliding rail is pulled over the interfaces of the section profiles.

Thanks to the integrated stop, the profile connector can be fastened precisely in the central position.

The profile connector is fixed in the interior slot, so that the slot on the outside is available for all kinds of superstructures.

- Size: 65, 90, 120
- Leg distance max. 300 mm from the cut edge
- Requires the use of the “Advanced” or “Premium” slide rails
- Only a rigid connection is permitted (not as a pivot point for height adjustment)
- Can only be connected to section profiles and horizontal sliding curves
