

Protective cover AL

- Reduced friction on curve wheels and patented roller curves to minimize wear to thereby realize longer sections
- Components subject to constant friction feature FDA-compliant materials
- Easy to clean thanks to ample draining surfaces
- Capable of accumulation
- Ball bearings sealed on both sides of non-rusting steel (1.4301) with FDA-compliant special grease
- Extension of the curve wheel to a curve wheel drive or alpine conveyor
- Longer service life and reduced downtimes thanks to low-friction curve technology in curve wheels and patented roller curves
