

UM 2/R-60 Return Unit

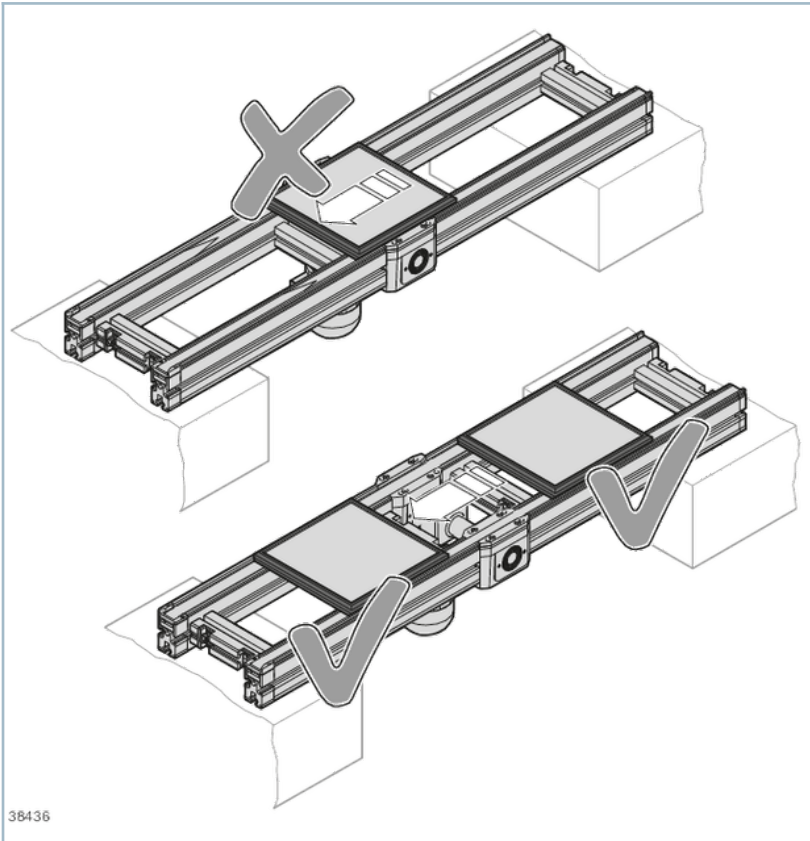

- For conveyor unit self-assembly
- Conveyor medium: accumulation roller chain (suitable for use in an EPA)

- For use in conjunction with all AS 2/R-... drive modules and ST 2/... sections
- Version with sliding piece for return, recommended for sections up to $l = 6000$ mm

Product description

The return unit is used to set up conveyor units. It guides the conveyor medium at the end of the conveyor unit back to the drive module.
