

Return stop WT

- The return stop prevents the VarioFlow plus workpiece pallet from rebounding from the stop gate or prevents a backward movement of the workpiece pallet when the chain is turned off and released
- Additional WT load max. 8 kg
- The return stop is attached behind the WT stop surface.

 [Assembly instructions](#)

- Can be attached both left and right on the section profile
- Simple and low-cost construction
- Non-rotating
- Also suitable for retrofitting without disrupting the lateral guide
