

PN kit for unlocking in the top end position

[PDF](#) Assembly instructions

Product description

The LG 2/H lift gate makes it possible to access or pass through the inner spaces of a belt section (BS). Manually tilting the belt section can open it from 0° to 85° or close it from 85° to 0°. The effort required to do this is reduced with the aid of a gas pressure spring.

Selection of the LG 2/H mounting kit appropriate to the belt section type
