

Reinforced frame module

- For self-assembly of workpiece pallets measuring 400 x 400 mm and above. Necessary for overall weights of workpiece pallets $m_W > 50$ kg and for conveying speeds $v_N > 12$ m/min
- 400 mm corner module

- 320 mm frame extension module
- Wide variety of workpiece pallet sizes can be achieved by combining standard modules
- Material:
 - Corner/extension module (PA) with PA (polyamide) wear pad
 - or
 - Corner/extension module (PA) with PE (= polyethylene) wear pad
- Can be combined with WT 2 carrying plates

Product description

Reinforced frame modules are used for self-assembly of workpiece pallets with dimensions from 400 x 400 mm. Necessary for workpiece pallet total weights > 50 kg or for conveyor speeds $v_N > 12$ m/min.

The PA basic solution is suitable for use on the belt/toothed belt and flat top chain conveyor media.

Frame modules with PE wear pads are required for use on the duplex chain and accumulation roller chain conveyor media.
