

Supporting bracket VFbelt AL

Supporting bracket for easy mounting of conveyor sections on horizontal profiles

- Supporting bracket is easily centered in the slot thanks to centering lugs
- Easy-to-clean design with draining surfaces
- Very simple installation thanks to pluggable screwed connection

The supporting bracket allows for the installation of one or more parallel sections on horizontal profiles at a defined distance from the conveyor medium. The distance between the supporting brackets in the

conveying direction is approx. 2 m, depending on speed, accumulation behavior and weight. They are fastened on a leg set made by the customer.

Scope of delivery

- Including fastening material
